**Directions (16–22): Read the passage carefully and answer the questions.**

Passage:

In a rapidly evolving digital world, financial literacy has become more important than ever. Many young adults begin earning without fully understanding budgeting, saving, or investing. As a result, they often struggle with debt and poor financial planning. To address this issue, several banks and institutions have started conducting financial awareness programs in schools and colleges.

One such initiative was launched in a small town where banking facilities were limited. Volunteers visited educational institutions and explained the importance of savings accounts, digital payments, and responsible borrowing. Initially, the response was lukewarm, as students believed finance was complicated and irrelevant to them.

However, through interactive workshops and real-life examples, the perception gradually changed. Students began asking questions about interest rates, online fraud, and investment options. Over time, the program improved awareness and encouraged families to adopt safer financial practices.
