PART-B (General English)

Q.No: 101 What does the idiom "to keep the wolf away from the door" mean?

To escape from a dangerous situation

To protect oneself from enemies

To stay away from risky opportunities

To avoid financial hardship

Q.No: 102 In the following question, a sentence with a blank is given, followed by five words labeled (1), (2), (3), (4), and (5). Choose the word that fills the blank appropriately in the context of the passage.

Often lauded as the "Pensioner's Paradise," Bangalore's climate (1) _____ a peculiar amalgamation of temperate breezes, erratic showers, and sun-drenched tranquility. During the early hours, a gauzy mist (2) _____ across the avenues, interweaving with the silhouettes of rain trees and colonial bungalows. By midday, however, the capricious temperament of the city asserts itself; cumulus clouds burgeon with astonishing alacrity, heralding brief but truculent showers. The fragrance of petrichor that (3) _____ earthiness, ascends from the soil, an olfactory benediction. Despite Bangalore's once-famed equanimity, urban sprawl has initiated climatic aberrations; seasons blend into each other with an almost imperceptible (4) **desuetude** of traditional patterns.

Evenings in Bangalore are imbued with a languorous coolness, suffused by whispering breezes that would had it not been for pollution, might have carried the pristine scent of blooming cassias. As the city grapples with its evolving climatic identity, one wonders whether the mellifluous interludes of sun, mist, and rain shall remain a (5) **vestige** or a continuum.

Choose correct tense. (1)

| Q.No: 107 | <p>Read the passage and answer the questions:</p> <p>"The idea that space and time form a four-dimensional continuum was first suggested by Hermann Minkowski as a natural consequence of Einstein's Special Theory of Relativity. In this framework, time is not an independent, absolute entity, as Newton had assumed, but rather interwoven with the three spatial dimensions into a single fabric known as space-time. Events occur at points in this space-time, and their separation is governed not by traditional Euclidean distance but by the relativistic interval, which remains invariant under changes of reference frame. This deep connection between space and time implies that the passage of time is not universal but relative: what one observer perceives as simultaneous may differ for another observer in relative motion.</p> <p>This concept becomes even more profound when we introduce gravity, as formulated in Einstein's General Theory of Relativity. Gravity is no longer thought of as a force in the Newtonian sense but rather as the curvature of space-time caused by the presence of mass and energy. Objects moving within this curved space-time follow geodesics—the natural paths dictated by the warping of space and time itself. This leads to the astonishing prediction that time runs differently in regions of varying gravitational potential: near a massive body, such as a black hole, time slows relative to an observer in free space. This effect, known as gravitational time dilation, has been confirmed through precise experiments, such as the observation that clocks aboard satellites tick slightly faster than those on Earth's surface due to weaker gravity.</p> <p>Which of the following best describes the grammatical structure of the sentence:</p> <p>"This deep connection between space and time implies that the passage of time is not universal but relative:"?</p> |

| Q.No: 112 | <p>Read the passage and answer the questions:</p> <p>In the relentless expansion of urban environments, the provision of public playgrounds often recedes into a peripheral concern, overshadowed by commercial imperatives and infrastructural demands. Yet, their significance transcends mere recreational utility. Playgrounds constitute critical arenas for cognitive, social, and physical development in children, fostering resilience, creativity, and communal identity. Despite the mounting corpus of research affirming these benefits, municipal authorities frequently exhibit a myopic focus on economic expediency, relegating green and play spaces to marginal status.</p> <p>The consequences of this oversight are profound. A deficit of accessible, safe play areas not only exacerbates sedentary behaviours among youth—contributing to escalating public health crises such as obesity and anxiety—but also erodes the social cohesion that vibrant urban communities depend upon. Playgrounds, when thoughtfully integrated into cityscapes, act as vital intergenerational nexuses, bridging demographic divides and cultivating a sense of belonging that sterile commercial zones cannot replicate.</p> <p>To rectify this imbalance, urban planners must adopt a paradigm that recognizes play as an essential urban function, not a dispensable luxury. Design strategies should prioritize inclusivity, sustainability, and aesthetic integration with the built environment. Only through intentional, visionary planning can cities nurture both their youngest residents and the communal fabric upon which their long-term vitality depends.</p> <p>Identify the correct function of the phrase "fostering resilience, creativity, and communal identity" in the sentence:</p> <p>"Playgrounds constitute critical arenas for cognitive, social, and physical development in children, fostering resilience, creativity, and communal identity."</p> |
| | Adjective phrase modifying "arenas" |
| | Adverbial phrase showing cause |
| | Present participial phrase explaining the result |
| | Gerund phrase acting as a subject |

| | |

Without concerted conservation, education, and ethical stewardship, the litany of extinction may soon engulf creatures whose absence would render the world infinitely poorer—both biologically and spiritually.</p> <p>According to the passage, why does the extinction of even a single species matter significantly?</p> |
|-----------|--|

It has no measurable effect on ecosystems.

It may destabilize entire ecosystems and trigger unpredictable consequences.

It reduces only the aesthetic diversity of nature.

It provides opportunities for other species to thrive.
