

SSC CGL 2025 • OLIVEBOARD TOPPER DATA

4 Toppers. 4 Journeys. 1 Platform.

AIR 1, 3, 4 and 6 in SSC CGL 2025 all prepared on Oliveboard. Their mock test data tells four very different stories — and four different paths to success.

PREP ON OLIVEBOARD

There is no single way to crack SSC CGL. But there is a pattern behind every top rank.
Each of these four cracked CGL it in a completely different way.

All 4 Toppers Chose the Same Plan:

SSC ELITE SUBSCRIPTION

	AIR 1 DHRUV RANA	AIR 3 N RAMCHARAN	AIR 4 BITAN MAJUMDAR	AIR 6 ANIRUDH SHARMA

ALL INDIA RANK 1

The Machine: Topper from Day 1

124 Mocks · 14 Months ·

He performed at the top level from day 1. From his very first mock on Oliveboard, he was in the top 2%. Fourteen months and 124 tests later, he was still there. His average performance in live tests and solo tests was always in the top 1-2%. Pressure didn't move the needle. Nothing did. That kind of consistency over 124 attempts isn't talent alone. It's what happens when preparation becomes automatic.

ALL INDIA RANK 3

The Builder: Maths Was His Problem. Then It Wasn't

111 Mocks · 21 Months ·

Most toppers look consistent in hindsight. His data tells a rarer story — you can see the improvement happening in real time. His Maths — his weakest section — improved by **13 percentile points** between the 2024 and 2025 exam cycles. That's not luck. That's what happens when you identify a gap through mock data and return to it relentlessly. Meanwhile, his English never wavered — 15 times at 100th percentile across both tiers. He kept his anchor while rebuilding his weakness.

ALL INDIA RANK 4

The Sprinter: Started in August. Ranked in January

69 Mocks · 6 Months ·

He proved that a late start doesn't mean a lost cause — if you know how to **sprint**. While other toppers had been on the platform for over a year, he showed up in August 2025 — just weeks before the Tier 1 exam. Then he did something extraordinary: **51 Tier 1 mocks in 38 days**. That's more than one mock every single day. His first 25 tests averaged 91.1 percentile. His last 26 averaged 98.1. He compressed months of improvement into weeks through sheer intensity. After Tier 1, he maintained the momentum with 18 more Tier 2 mocks — disciplined, targeted, and on time.

The Wall: The Most Balanced Topper

97 Mocks · 23 Months ·

In 97 mock tests over 23 months, he had just two bad days. That's not a stat. That's a fortress. He had the longest streak of any topper on the platform — **31 consecutive tests above 97th percentile**. Where other toppers had one dominant section, he was the most balanced of all four: 12 times at 100th percentile in Maths, 13 times in English. No section was a liability. In his final push, he gave 19 Tier 2 mocks in a single month. He didn't peak. He simply never fell.

PREPARING ON OLIVEBOARD

What Their Data Teaches You

Four toppers, four styles. But the patterns that matter are the ones they share.

01 There is no single “right” timeline.

Ramcharan(AIR3) took 21 months. Bitan (AIR4) took 6. Both made the top 4. What matters isn't when you start, it's the intensity you bring when you do.

Bitan gave 51 mocks in 38 days. Ramcharan gave 111 across 21 months. Same result bracket.

02 Volume is non-negotiable.

401 mocks across four toppers. The lowest count was 69 (and that was crammed into 6 months at extreme intensity). Nobody in the top 6 winged it. Every one of them practiced relentlessly.

Average: 100 mocks per topper. Minimum : more than 1 mock per day at peak.

03 Your weakness will decide your rank — not your strength.

AIR3's Maths went from 78 to 91. That ~13-point jump while preparing is likely what separated AIR 3 from a much lower rank. Your best section has a ceiling. Your worst section has a runway.

Every topper scored 100th percentile across multiple sections — no one had a gap.

04 Consistency beats peaks.

Aspirants screenshot their best score and move on. Toppers look at their worst score and analyze. Anirudh (AIR 6) had 31 consecutive tests above 97th percentile. Dhruv (AIR 1) never had a bad month.

The exam rewards the person who shows up consistently every time.

05 Same mocks. Same Analytics. No Special Access.

Every topper used the same Oliveboard mocks and analytics. They didn't just take tests — they used percentile data to find weak sections, track improvement, and know when they were ready. The data told them what to fix. The mocks gave them the reps to fix it.

A machine, a builder, a sprinter, and a wall.
Different journeys. Same system. Built on Oliveboard.
