सी०ई०एन० ०९/२०२५-७ वें सीपीसी वेतन मैट्रिक्स के लेवल १ में विभिन्न पदों हेतु

CEN 09/2025 - Various Posts in Level 1 of 7th CPC Pay Matrix

Test Date	19/08/2026
Test Time	9:00 AM - 10:30 AM
Subject	RRB Level 01 Stage I 2025

Q.1 If a copper wire and an iron wire of the same length and area are compared, which is the one with higher resistance?

Ans A). Copper wire B). Both equal C). Iron wire D). Cannot be determined

Correct Answer: C

Q.2 After a severe injury, a patient's blood pressure decreases and they start to develop extensive bruising. Which dual failure in physiological systems best explains these clinical observations?

Ans A). Decreased oxygen transport and increased tissue fluid B). Enhanced lymph flow and increased platelet aggregation
C). Reduced plasma protein synthesis and increased red blood cell count D). Reduced platelet function and impaired lymphatic drainage

Correct Answer: D

Q.3 Which equation correctly represents the reaction between calcium and cold water?

Ans A). $\text{Ca} + \text{H}_2\text{O} \rightarrow \text{CaOH}_2 + \text{H}_2$ B). $2\text{Ca} + \text{H}_2\text{O} \rightarrow 2\text{CaOH} + \text{H}_2$ C). $\text{Ca} + 2\text{H}_2\text{O} \rightarrow \text{Ca}(\text{OH})_2 + \text{H}_2$ D). $\text{Ca} + \text{H}_2\text{O} \rightarrow \text{CaH}_2 + \text{O}_2$

Correct Answer: C

Q.4 Which organ directly filters nitrogenous waste from human blood?

Ans A). Lungs B). Heart C). Kidneys D). Liver

Correct Answer: C

Q.5 If a car and a truck are pushed with the same force, which will accelerate more according to the second law of motion?

Ans A). Both will accelerate equally B). Neither will accelerate C). The car will accelerate more D). The truck will accelerate more

Correct Answer: C

Q.6 Which pH range is best for most plants to grow in garden soil?

Ans A). Between pH 4 and pH 5 B). Between pH 6 and pH 7.5 C). Between pH 8.5 and pH 9.5 D). Between pH 3 and pH 4

Correct Answer: B

Q.7 Consider the following reactions:

Which of the above reactions are precipitation reactions?

Ans A). Only I and III B). Only III and IV C). Only I and II D). Only II and IV

Correct Answer: C

Q.8 What is the general formula for alkanes with 'n' carbon atoms?

Ans A). $\text{C}_n\text{H}_{2n+1}$ B). $\text{C}_n\text{H}_{2n-2}$ C). $\text{C}_n\text{H}_{2n+2}$ D). C_nH_{2n}

Correct Answer: C

Q.9 A group of engineers is tasked with designing a lecture hall for maximum speech intelligibility. Which combination of features should they prioritize to minimize reverberation?

- Ans A). Upholstered seating with bare walls and floors B). High ceilings with reflective panels
C). Soft wall coverings, acoustic ceiling tiles, and upholstered seating D). Polished stone floors and glass walls

Correct Answer: C

Q.10 A scientist is investigating why certain EM waves from the Sun do not reach the Earth's surface. Which property of gamma rays primarily explains their absence at ground level?

- Ans A). They are absorbed by upper atmosphere B). They have long wavelength C). They are scattered by clouds
D). They are reflected by Earth's surface

Correct Answer: A

Q.11 In which combined form is oxygen found in the air besides free O₂?

- Ans A). Carbon dioxide B). Nitrogen gas C). Argon D). Methane

Correct Answer: A

Q.12 During an experiment, a student gradually lowers the angle of an ideal ramp while pulling a toy cart to the same height. What observation should the student expect?

- Ans A). The force required increases. B). The force required decreases. C). The force required remains constant.
D). The cart gains less potential energy.

Correct Answer: B

Q.13 Which of the following is a characteristic property of a suspension?

- Ans A). Its particles can be seen with the naked eye B). It only burns with a blue flame C). Its components cannot be separated
D). It is a true solution

Correct Answer: A

Q.14 In terms of potential, why does water not flow in a perfectly horizontal tube?

- Ans A). Because the tube is made of plastic B). Because gravity does not act on horizontal water
C). Because there is no pressure difference between the two ends D). Because there is no tank connected

Correct Answer: C

Q.15 Carbon forms millions of stable compounds, unlike most other elements. Which combination of properties best explains this behavior?

- Ans A). Strong covalent bonding and tetravalency together B). Low atomic mass and small atomic size
C). Presence of isotopes and nuclear stability D). High chemical reactivity and tetravalency together

Correct Answer: A

Q.16 The formula unit mass of ammonium sulphate, (NH₄)₂SO₄, is:

- Ans A). 136 u B). 114 u C). 132 u D). 118 u

Correct Answer: C

Q.17 A ball rolls down a hill with no friction and reaches the bottom. Which statement best describes how the energy changes as the ball moves?

- Ans A). Both potential and kinetic energy increase as the ball moves B). The ball's kinetic energy decreases as it moves downward
C). The total energy of the ball increases as it rolls D). The ball's potential energy decreases while its kinetic energy increases

Correct Answer: D

Q.18 A wave has a frequency of 200 Hz and a wavelength of 1.7 m. What does their product represent?

- Ans A). The amplitude of the wave B). The speed of the wave C). The loudness of the wave D). The period of the wave

Correct Answer: B

Q.19 Why does the emergent beam from a prism show distinct colors instead of a single white band?

- Ans A). Each color bends by a different amount B). All colors bend equally C). Some colors are absorbed D). All colors emerge parallel

Correct Answer: A

Q.20 Farmers use cutting, grafting, and tissue culture to grow many plants with the same useful traits. These methods are preferred as:

- Ans A). They always create new varieties. B). They stop flowering in plants. C). They depend on pollinating insects.
D). They produce genetically identical plants.

Correct Answer: D

Q.21 Which of the following is **NOT** a part of the musculoskeletal system?

- Ans A). Muscles B). Bones C). Tendons D). Nephrons

Correct Answer: D

Q.22	Which type of nerves arise from the brain in humans?			
Ans	A). Autonomic nerves	B). Motor nerves	C). Cranial nerves	D). Spinal nerves
Correct Answer: C				
Q.23	If the velocity-time graph of a moving object shows a straight line parallel to the time axis, what can be concluded about the object's acceleration?			
Ans	A). The object has uniform acceleration	B). The object has changing acceleration	C). The object has negative acceleration	D). The object has zero acceleration
Correct Answer: D				
Q.24	A desert plant absorbs carbon dioxide at night and uses it during the day for photosynthesis. Which property of photosynthesis does this illustrate?			
Ans	A). Water is unnecessary for photosynthesis in desert plants	B). Photosynthesis occurs only at night in desert plants	C). Photosynthesis can involve intermediate compounds stored for later use	D). Carbon dioxide is not required for photosynthesis in desert plants
Correct Answer: C				
Q.25	What is formed when a non-metal gains electrons?			
Ans	A). Proton	B). Neutral	C). Anion	D). Cation
Correct Answer: C				
Q.26	Arvind bought an article for ₹x. He sold it to Biru at a loss of 27%. Biru spent ₹163 on its transportation and sold it to Minu at a profit of 60%. If Minu bought it for ₹1,896, then what is the value of x?			
Ans	A). 1,382	B). 1,400	C). 1,388	D). 1,386
Correct Answer: B				
Q.27	Which of the following best describes the median in the given set of data values?			
	Profit (₹)	Number of Shops		
	1,000-2,000	12		
	2,000-3,000	18		
	3,000-4,000	20		
	4,000-5,000	15		
	5,000-6,000	5		
Ans	A). ₹3,250	B). ₹3,150	C). ₹3,300	D). ₹3,200
Correct Answer: A				
Q.28	Ravi, Sohan, Raghu and Ani distributed a sum of money amongst themselves in the ratio of 7 : 4 : 6 : 3. If Raghu's share is ₹1,800 more than Ani's share, then what is Sohan's share?			
Ans	A). ₹2,300	B). ₹2,200	C). ₹2,400	D). ₹2,500
Correct Answer: C				
Q.29	Find the greatest number that divides 85, 153, and 221 leaving the same remainder in each case.			
Ans	A). 34	B). 38	C). 60	D). 68
Correct Answer: D				
Q.30	The population of a district is 3,35,000, out of which 2,14,000 are males. 31% of the population is literate. If 31% males are literate, then what percentage of females are literate?			
Ans	A). 30%	B). 28%	C). 31%	D). 33%
Correct Answer: C				
Q.31	What is the minimum number of identical square tiles required to completely floor a room measuring 4m x 3.2 m?			
Ans	A). 9	B). 18	C). 40	D). 20
Correct Answer: D				
Q.32	A boatman can travel 22 km downstream and 15 km upstream in 3 hours and 20 minutes. He can also travel 14 km downstream and 12 km upstream in 2 hours and 24 minutes. What is the speed of the boat in still water? (Round off your answer to two decimal places.)			
Ans	A). 13.15 km/h	B). 11.15 km/h	C). 11.75 km/h	D). 13.50 km/h
Correct Answer: B				

Q.42 The given pie charts show the distribution of students in different streams in two schools, A and B. If school A has 1000 students and school B has 1200 students, what is the difference in the number of students in the science stream between the two schools?

SCHOOL A

SCHOOL B

Ans A). 100 B). 180 C). 200 D). 150

Correct Answer: B

Q.43 Find the simple interest (in ₹) on ₹1,500 at an interest rate of 3% per month in 1 month.

Ans A). 23.75 B). 3.75 C). 45 D). 7.50

Correct Answer: C

Q.44 A sum of ₹60,000 is invested for 1 year at 4% per annum, compounded half yearly. What is the compound interest earned at the end of the year?

Ans A). ₹3,102 B). ₹2,424 C). ₹2,999 D). ₹3,244

Correct Answer: B

Q.45 A wholesaler marked school uniforms at ₹1,200 each. He offered a 25% trade discount to a retailer. The retailer also received a scheme discount of 1 uniform free for every 5 purchased. Additionally, if the payment was made within 10 days, a cash discount of 8% on the billed amount (after trade discount) was offered. If the retailer received 72 uniforms in total and made the payment within 10 days, find the effective price per uniform in rupees.

Ans A). ₹672 B). ₹668 C). ₹690 D). ₹700

Correct Answer: C

Q.46 The angle of elevation of the top of a hill at the foot of a tower is 60° and the angle of depression from the top of the tower to the foot of the hill is 30° . If the tower is 96 m high, find the difference between the height of the hill and the height of the tower.

Ans A). 163 m B). 192 m C). 172 m D). 188 m

Correct Answer: B

Q.47	Pipe A can fill a tank in 6 hours, pipe B can fill the same tank in 21 hours and pipe C can fill the same tank in 28 hours. The time taken (in hours) by them to fill one-fourth of the same tank if they operate together is:	Ans A). 4	B). 1	C). 3	D). 2	Correct Answer: B
Q.48	10 kg of rice at ₹22.50 per kg is mixed with 10 kg of rice at ₹37.50 per kg. What is the price per kg (in ₹) of the mixture?	Ans A). 30	B). 22	C). 25	D). 28	Correct Answer: A
Q.49	Kaushal travelled for 14 hours 10 minutes at the speed of 60 km/h. At what speed (in km/h) should he travel to cover the same distance in 17 hours?	Ans A). 50	B). 52	C). 51	D). 53	Correct Answer: A
Q.50	If $\frac{\sin^2\theta}{\tan^2\theta - \sin^2\theta} = \frac{1}{3}$, $0^\circ < \theta < 90^\circ$, then the value of $(\cot\theta + \operatorname{cosec}\theta)$ is:	Ans A). $\sqrt{3}$	B). $3\sqrt{3}$	C). $1 - \sqrt{3}$	D). $2 + \sqrt{3}$	Correct Answer: A
Q.51	B, D, E, P, S, T and W are sitting around a circular table, facing the centre of the table. S sits third to the left of D. B sits second to the left of T. D is an immediate neighbor of both E and B. W is not an immediate neighbor of S. How many people sit between P and B when counted from the right of P?	Ans A). Two	B). One	C). Four	D). Three	Correct Answer: A
Q.52	Which of the following options should come in place of the question mark (?) in the given series? 21 23 27 33 41 ?	Ans A). 51	B). 50	C). 48	D). 53	Correct Answer: A
Q.53	P, Q, R, S, T and U live on six different floors of the same building. The lowermost floor in the building is numbered 1, the floor above it is numbered 2 and so on, till the topmost floor, which is numbered 6. Only two people live between U and Q. Only P lives above R. S lives on an even-numbered floor. U lives on the lowermost floor. How many people live between T and P?	Ans A). Three	B). One	C). Four	D). Two	Correct Answer: D
Q.54	Each vowel in the word AWAKENED is changed to the letter immediately following it in the English alphabetical order AND each consonant is changed to the letter immediately preceding it in the English alphabetical order. Which of the following letters will appear exactly twice in the group of letters thus formed?	Ans A). B	B). M	C). C	D). J	Correct Answer: A
Q.55	If + means -, - means $\times$, $\times$ means $\div$, $\div$ means +, then what will come in place of the question mark (?) in the following equation? $90 - 5 + 120 \times 4 \div 18 = ?$	Ans A). 428	B). 442	C). 438	D). 434	Correct Answer: C
Q.56	W, X, Y, Z, M, and N are sitting around a circular table facing the center. Z sits to the immediate right of X. Only three people sit between N and W when counted from the right of W. Y sits second to the left of Z. M sits to the immediate right of N. Who sits to the immediate right of M?	Ans A). N	B). X	C). Y	D). W	Correct Answer: D
Q.57	Each vowel in the word PRACTICE is changed to the letter immediately following it in the English alphabetical order, and each consonant is changed to the letter immediately preceding it in the English alphabetical order. Which of the following letters will appear exactly twice in the group of letters thus formed?	Ans A). None of the letters appear exactly twice	B). Q	C). S	D). H	Correct Answer: A

Q.58 In a certain code language,
A + B means 'A is the son of B',
A – B means 'A is the brother of B',
A @ B means 'A is the wife of B' and
A % B means 'A is the father of B'.
Based on the above, how is S related to N if 'S – A + E @ R % N'?

Ans A). Father B). Brother C). Son D). Husband

Correct Answer: B

Q.59 This question is based on the five, three-digit numbers given below.
(Left) 813 845 591 372 862 (Right)
(Example- 697 – First digit = 6, second digit = 9 and third digit = 7)
NOTE - All operations to be done from left to right.

What will be the resultant if the second digit of the second highest number is added to the third digit of the lowest number?

Ans A). 5 B). 7 C). 6 D). 9

Correct Answer: C

Q.60 Each of Laxmi, Mani, Ravi, Shivani, Navi, Anita and Pallavi has exam on a different day of a week starting from Monday and ending on Sunday of the same week.
Only three people have exams between Ravi and Shivani.
Only two people have exams between Laxmi and Mani.
Pallavi has exam immediately before Laxmi.
Shivani has exam before only two people.
Neither Mani nor Laxmi has exam on the last day of the week.
Navi does not have exam on any of the days before Anita.
Three of the following four options are alike in a certain way based on the given arrangement and thus form a group. Which is the one that does NOT belong to that group?

Ans A). Ravi and Laxmi B). Laxmi and Shivani C). Anita and Ravi D). Pallavi and Anita

Correct Answer: C

Q.61 In a certain code language,
A # B means 'A is the son of B',
A % B means 'A is the brother of B',
A – B means 'A is the wife of B' and
A @ B means 'A is the father of B'.

How is M related to K if 'M – E # W @ P % K'?

Ans A). Wife B). Daughter C). Brother's wife D). Brother's daughter

Correct Answer: C

Q.62 This question is based on the given words.

ICE MET JAW GUM

How many letters are there in the English alphabetical order between the first letter of the second word from the right and the second letter of the first word from the left?

Ans A). 7 B). 6 C). 9 D). 5

Correct Answer: B

Q.63 Based on the alphabetical order, three of the following four are alike in a certain way and thus form a group. Which is the one that does not belong to that group?
(Note: The odd man out is not based on the number of consonants/vowels or their position in the letter cluster.)

Ans A). DFI B). SUX C). GIK D). NPS

Correct Answer: C

Q.64 Based on the English alphabetical order, three of the following four are alike in a certain way and thus form a group. Which is the one that does not belong to that group? (Note: The odd one out is not based on the number of consonants/vowels or their position in the letter cluster.)

Ans A). TBU B). NFX C). OGY D). SKC

Correct Answer: A

Q.65 If 2 is subtracted from each odd digit and 2 is added to each even digit in the number 272465937257, what will be the sum of the digits which are second from the left and second from the right in the new number thus formed?

Ans A). 7 B). 9 C). 8 D). 6

Correct Answer: C

Q.66 Refer to the following letter series and answer the question that follows. Counting to be done from left to right only. (Left) T S W H M F K Z I N O A B Q S P J M L R C V E W O (Right) How many letters are there, as per the English alphabetical order, between the letter that is sixth from the right end and the third from the left end of the given series? Ans A). 2 B). 5 C). 4 D). 3 Correct Answer: C
Q.67 Refer to the following letter series and answer the question that follows. Counting to be done from left to right. (Left) O V U I C G X I A U Y U S L M X U Q T I W I (Right) How many such vowels are there, each of which is immediately preceded by a consonant and also immediately followed by a consonant? Ans A). 5 B). 2 C). 3 D). 4 Correct Answer: C
Q.68 In the following triads, each group of letters is related to the subsequent one following a certain logic. Select from the given options, the one which follows the same logic. SHIP - HISP - SHPI ROAD - OARD - RODA Ans A). MAKE - AMEK - KEMA B). NOTE - NETO - ETON C). PARK - ARPK - PAKR D). FILE - ELIF - ILEF Correct Answer: C
Q.69 In a certain code language, 'RAIL' is coded as '9653' and 'BAIL' is coded as '9316'. What is the code for 'B' in the given code language? Ans A). 3 B). 1 C). 9 D). 6 Correct Answer: B
Q.70 Arvinda starts from point L and drives for 6 km towards south. He then takes a right turn and drives for 11 km, then he takes a right turn and drives for 3 km. He then takes a left turn and drives for 5 km. He finally takes a right turn and drives for 3 km to reach Point Z. How far (shortest distance) and towards which direction should he drive in order to reach Point L again? (All the turns are 90-degree turns only unless specified.) Ans A). 10 km towards south B). 11 km towards west C). 16 km towards east D). 16 km towards north Correct Answer: C
Q.71 120 is related to 11 following a certain logic. Following the same logic, 255 is related to 16. To which of the following is 323 related, following the same logic? (NOTE: Operations should be performed on the whole numbers, without breaking down the numbers into their constituent digits. E.g. 13 – Operations on 13 such as adding/subtracting/multiplying etc. to 13, can be performed. Breaking down 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is not allowed.) Ans A). 18 B). 19 C). 14 D). 28 Correct Answer: A
Q.72 Each of the digits in the number 9357146 is arranged in ascending order from left to right. The position of how many digits will remain unchanged as compared to that in the original number? Ans A). None B). One C). Three D). Two Correct Answer: B
Q.73 A question is followed by two statements numbered I and II. You have to decide whether the data provided in the statements are sufficient to answer the question. Read both the statements and select the most appropriate answer. Question: Among 5 trees, L, M, O, P and Q, each having a different height, which tree is the tallest? Statements: (I) O is taller than L but shorter than M.O is shorter than only one tree. (II) L is taller than Q. Ans A). Both statements I and II together (and not statement 1 alone or statement II alone) are sufficient to answer the question. B). Both statements I and II together are not sufficient to answer the question. C). Data in Statement I alone is sufficient to answer the question, while data in statement II is not. D). Data in Statement II alone is sufficient to answer the question, while data in statement I is not. Correct Answer: C

Q.74 Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statements.

Statements:

All hens are ducks.
All ducks are bananas.

Conclusions:

(I) Some bananas are ducks.
(II) All hens are bananas.

Ans A). Only conclusion (I) follows. B). Both conclusions (I) and (II) follow. C). Neither conclusion (I) nor (II) follows.
D). Only conclusion (II) follows.

Correct Answer: B

Q.75 NX 15 is related to OU 6 in a certain way. In the same way, UO 13 is related to VL 4. To which of the following is ON 11 related, following the same logic?

Ans A). OL 4 B). PL 4 C). PK 2 D). OK 2

Correct Answer: C

Q.76 What should come in place of ? in the given series based on the English alphabetical order?
BBX ECU HDR KEO ?

Ans A). MKI B). NMB C). NFL D). NHG

Correct Answer: C

Q.77 Which of the following letter-clusters should replace # and % so that the pattern and relationship followed between the letter-cluster pair on the left side of :: is the same as that on the right side of :: ?
: VAK :: OTD : %

Ans A). # = NRB , % = XCM B). # = MRB , % = YCM C). # = MRB , % = XCM D). # = MRB , % = XMC

Correct Answer: C

Q.78 Two sets of numbers are given below. In each set of numbers, certain mathematical operation(s) on the first number result(s) in the second number. Similarly, certain mathematical operation(s) on the second number result(s) in the third number and so on. Which of the given options follows the same set of operations as in the given sets? (NOTE: Operations should be performed on the whole numbers, without breaking down the numbers into their constituent digits. E.g. 13 – Operations on 13 such as adding / subtracting / multiplying to 13 can be performed. Breaking down 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is not allowed.)
6 - 12 - 22 - 44;
7 - 14 - 24 - 48

Ans A). 5-10-22-44 B). 11-22-32-64 C). 9-18-28-38 D). 8-16-26-36

Correct Answer: B

Q.79 Each of A, B, C, D, E, F, and G has an exam on a different day of a week starting from Monday and ending on Sunday of the same week. B has an exam on Wednesday. Only one person has an exam between B and D. C has exam on the day immediately before D. Only two people have exams between C and F. E's exam is on one of the days before G but on one of the days after A. G does not have any exam on Sunday. Who has an exam on Monday?

Ans A). F B). C C). A D). G

Correct Answer: C

Q.80 Refer to the following letter series and answer the question that follows. (Counting to be done from left to right only).

(Left) K I F R I Z O K U F U I I F U K Y X A B (Right)

How many such vowels are there each of which is immediately preceded by a vowel and also immediately followed by a vowel?

Ans A). One B). Two C). Three D). Zero

Correct Answer: A

Q.81 What is the name of the initiative proposed in the Union Budget 2026–27 to strengthen India's ecosystem for the production of biologics and biosimilars?

Ans A). Pharma Vision 2030 B). BioIndia Mission C). Biopharma SHAKTI D). National Biologics Development Scheme

Correct Answer: C

Q.82	Which country hosted the 2026 Commonwealth Youth and Junior Weightlifting Championships conducted at the Tuanaimato Sports Complex in Apia during April–May 2026?			
Ans	A). Tonga	B). Fiji	C). Vanuatu	D). Samoa
	Correct Answer: D			
Q.83	In January 2026, the One Nation One Subscription (ONOS) initiative mainly aimed to improve access to which resource?			
Ans	A). Government land record databases	B). Public sector employment portals	C). International academic research journals	D). National digital television channels
	Correct Answer: C			
Q.84	The ‘Saheli Pink Smart Card’ scheme, launched by President Droupadi Murmu in March 2026 to strengthen women’s welfare and social security, was introduced by the government of which Union Territory?			
Ans	A). Chandigarh	B). Jammu and Kashmir	C). National Capital Territory (NCT) of Delhi	D). Puducherry
	Correct Answer: C			
Q.85	At the India AI Impact Summit 2026, Union Health Minister J. P. Nadda launched which two AI-based healthcare initiatives on February 17, 2026?			
Ans	A). AROGYA and SAKSHAM	B). NIRAMAY and PRAGATI	C). SEHAT and VIKAS	D). SAHI and BODH
	Correct Answer: D			
Q.86	In May 2026, India elevated its bilateral ties with Italy to a unique level previously only held with South Korea. What is this designation?			
Ans	A). Green Technology and Innovation Strategic Partnership	B). Comprehensive Global Strategic Partnership	C). Special and Privileged Strategic Partnership	D). Special Strategic Partnership
	Correct Answer: D			
Q.87	Which of these Indian institutes launched the Bharat Cancer Genome Atlas in February 2026 to create India's first comprehensive cancer genome database?			
Ans	A). Gujarat Cancer & Research Institute, Ahmedabad	B). Indian Institute of Science, Bengaluru	C). Apollo Proton Cancer Centre, Chennai	D). Indian Institute of Technology, Madras
	Correct Answer: D			
Q.88	Which Indian public sector bank announced the opening of its 10,000th branch in November 2025?			
Ans	A). HDFC Bank	B). Axis Bank	C). Indian Bank	D). Canara Bank
	Correct Answer: D			
Q.89	Who had become the fastest Indian sprinter in 2026 after clocking 10.09 seconds in the men’s 100m final at the Federation Cup held in Ranchi, Jharkhand?			
Ans	A). Amlan Borgohain	B). Manikanta Hoblidhar	C). Gurindervir Singh	D). Animesh Kujur
	Correct Answer: C			
Q.90	Who authored the book "The Sage who Reimagined Hinduism: The Life, Lessons and Legacy of Sree Narayana Guru", released by Vice-President C. P. Radhakrishnan in New Delhi?			
Ans	A). Dr. Bibek Debroy	B). Dr. S. Jaishankar	C). Dr. Kiran Bedi	D). Dr. Shashi Tharoor
	Correct Answer: D			
Q.91	Which national organization launched the Central Prabhari Officer (CPO) Portal in May 2026 for improving real-time governance and last-mile delivery?			
Ans	A). National Statistical Office	B). National Development Council	C). NITI Aayog	D). Competition Commission of India
	Correct Answer: C			
Q.92	In March 2026, Kuno National Park in Madhya Pradesh was in the news after the birth of five cheetah cubs increased India’s total cheetah population to:
