A question has been given in this question and a statement related to it. Read the passage carefully and review the statement based on it.

In the Uttam Singh Nagar district of Uttarakhand, intense olfactory elephants are known as a boon for the police to curb the illegal liquor business. These intense olfactory power elephants are found in the forests of Khatima district, which are used for making alcohol, find and destroy them. To avoid the raid of liquor makers, liquor makers do the work of drinking wine in the forests or in the drainage channels, which require water for fermentation.

Lohan is closed by filling in barrels or polythene bags and pressed into soil for four to five days for fermentation. Khastima Police Station Inspector Yogesh Upadhyay said that elephants get the smell of this substance and reach the place and destroy barrels to drink this drug. He told that some traders make scarves on the trees and keep the barrels there, but the police easily reach them. Inspector Upadhyay said that "we have destroyed thousands of liters of lahans in the last

two-three months, which were stored in barrels on scaffolds." He further says, "To prevent elephants from lumbering elephants, The elephants discovered it and destroyed them for drinking. This caused huge losses to the wine makers. "A villager said," In villages, liquor is 80-100 rupees. Central is sold by the liter, Because it is cheaper than alcohol available in the liquor market. That's why people buy it even knowing its bad effects on health. " Elephants are playing an important role in curbing this business.

Statement: Those who make the lasers are causing heavy losses due to elephants.

Select the most suitable option below.

A-statement is absolutely true.

B-Query is probably true.

C-statement can not be reviewed.

D-statement is completely false.

A question has been given in this question and a statement related to it. Read the passage carefully and review the statement based on it.

In the Uttam Singh Nagar district of Uttarakhand, intense olfactory elephants are known as a boon for the police to curb the illegal liquor business. These intense olfactory power elephants are found in the forests of Khatima district, which are used for making alcohol, find and destroy them. To avoid the raid of liquor makers, liquor makers do the work of drinking wine in the forests or in the drainage channels, which require water for fermentation.

Lohan is closed by filling in barrels or polythene bags and pressed into soil for four to five days for fermentation. Khatima Police Station Inspector Yogesh Upadhyay said that elephants get the smell of this substance and reach the place and destroy barrels to drink this drug. He told that some traders make scarves on the trees and keep the barrels there, but the police easily reach them. Inspector Upadhyay said that "we have destroyed thousands of liters of lahans in the last two-three months, which were stored in barrels on scaffolds." He further says, "To prevent elephants from lumbering elephants, The elephants discovered it and destroyed them for drinking. This caused huge losses to the wine makers. "A villager said," In villages, liquor is 80-100 rupees. Central is sold by the liter, Because it is cheaper than alcohol available in the liquor market. That's why people buy it even knowing its bad effects on health. " Elephants are playing an important role in curbing this business.

Statement: Barrels of Lohan were kept hiding on trees to protect them from the police.

Select the most suitable option below.

A-statement is absolutely true.

B-Query is probably true.

C-statement can not be reviewed.

D-statement is completely false.

(A) B - (Alternative 2)

(B) D - (Alternative 4)

(C) A - (Alternative 1)

(D) C - (Alternative 3)

In this question two statements and two related findings have been given in the form of i and ii. You should consider the things given in the statements as true and to decide which conclusions regarding the statements, logically beyond any doubt Are rational?

Statement: All fans are light. All are light chargers.

Conclusion:

i) All fans are chargers.

ii) Some chargers are light.

Select the most appropriate option in the following options:

A. The only conclusion i is logical is

B. The only conclusion ii is logical is

C. either the conclusions i or ii is logical

D. Neither the conclusions i nor ii is rational

E. i and ii both conclusions are logical.

Read the given information carefully and answer the questions related to it.

10 people are sitting in two parallel rows. In each line, 5-5 people are sitting in such a way that the interval between them is equal.

In the first line- M, N, O, P and Q are all sitting on the south side.

In the second row- A, B, C, D and E are all sitting facing the north.

Therefore, according to the above arrangement of sitting, every person's face sitting in the first row is in front of every person sitting in the second row.

- i) B is sitting opposite him, which is sitting in the second position on the left side of P.
 ii) A is a neighbor of B and A is not sitting in front of the person who is sitting at the end of the line next to P.
 iii) O and C are sitting in front of each other.
 iv) Q is in the middle of N and M, which is in front of A.
 v) E is not sitting on any end of the line.

Which of the following pairs of people are sitting at the end of the line?

- (A) B, D - (Alternative 1)
 (B) O, Q - (Alternative 4)
 (C) P, M - (Alternative 2)
