_	Select the sentence containing the homonym of the highlighted word: The choir began the introit at the priest's signal.
	The child sang the introit during the intermission.
	The introit was replaced by an organ improvisation.
	The missal included Latin text for the introit.
	The cantor rehearsed the Sunday introit.

O.No: 90 Read the following passage and answer the questions based on the passage: While education and wisdom are often conflated in colloquial discourse, a discerning mind perceives a fundamental divergence between the two. Education is the formal acquisition of knowledge, often measured through degrees, academic accolades, and proficiency in structured disciplines. It is delivered through systematic curricula, institutionalized assessment, and theoretical frameworks. However, wisdom transcends this rigidity; it is the judicious application of knowledge to real-life contexts, enriched by experience, introspection, and emotional intelligence. An individual may be extensively educated yet remain bereft of wisdom if they lack the discernment to apply their learning ethically and effectively. Conversely, many wise individuals—farmers, artisans, elders may not possess formal education, but their decisions exhibit prudence and sagacity cultivated through lived realities. Thus, education equips the mind, but wisdom enriches the soul. In an era dominated by information overload and algorithmic thinking, the schism between the two has widened. Educational institutions often prioritize rote memorization and standardized testing over critical thinking and moral reasoning. Consequently, society produces individuals proficient in problem-solving but deficient in decisionmaking that requires empathy, patience, or foresight. Wisdom, being innately human, cannot be downloaded or fast-tracked; it is earned through trial, failure, reflection, and a nuanced understanding of human nature. Furthermore, while education is temporally bounded—ending with formal schooling or academic milestones—wisdom is a lifelong pursuit. It does not boast certificates but manifests in humility, ethical consistency, and the ability to navigate ambiguity with grace. Ultimately, the highest form of intelligence lies not merely in knowing what is right, but in consistently choosing to do it, especially when it is inconvenient. According to the passage, how is wisdom primarily acquired? Through textbooks Through emotional detachment Through experience and reflection Through algorithmic thinking

O.No: 91 Read the following passage and answer the questions based on the passage: While education and wisdom are often conflated in colloquial discourse, a discerning mind perceives a fundamental divergence between the two. Education is the formal acquisition of knowledge, often measured through degrees, academic accolades, and proficiency in structured disciplines. It is delivered through systematic curricula, institutionalized assessment, and theoretical frameworks. However, wisdom transcends this rigidity; it is the judicious application of knowledge to real-life contexts, enriched by experience, introspection, and emotional intelligence. An individual may be extensively educated yet remain bereft of wisdom if they lack the discernment to apply their learning ethically and effectively. Conversely, many wise individuals—farmers, artisans, elders may not possess formal education, but their decisions exhibit prudence and sagacity cultivated through lived realities. Thus, education equips the mind, but wisdom enriches the soul. In an era dominated by information overload and algorithmic thinking, the schism between the two has widened. Educational institutions often prioritize rote memorization and standardized testing over critical thinking and moral reasoning. Consequently, society produces individuals proficient in problem-solving but deficient in decisionmaking that requires empathy, patience, or foresight. Wisdom, being innately human, cannot be downloaded or fast-tracked; it is earned through trial, failure, reflection, and a nuanced understanding of human nature. Furthermore, while education is temporally bounded—ending with formal schooling or academic milestones—wisdom is a lifelong pursuit. It does not boast certificates but manifests in humility, ethical consistency, and the ability to navigate ambiguity with grace. Ultimately, the highest form of intelligence lies not merely in knowing what is right, but in consistently choosing to do it, especially when it is inconvenient. What does the author mean by "wisdom enriches the soul"? It enhances academic success It fosters deeper moral insight It improves verbal expression It sharpens mathematical skills

O.No: 92 Read the following passage and answer the questions based on the passage: While education and wisdom are often conflated in colloquial discourse, a discerning mind perceives a fundamental divergence between the two. Education is the formal acquisition of knowledge, often measured through degrees, academic accolades, and proficiency in structured disciplines. It is delivered through systematic curricula, institutionalized assessment, and theoretical frameworks. However, wisdom transcends this rigidity; it is the judicious application of knowledge to real-life contexts, enriched by experience, introspection, and emotional intelligence. Who, according to the author, can be wise despite lacking formal education? Scientists School children Elders and artisans

Technocrats

Q.No: 93 Read the following passage and answer the questions based on the passage:

While education and wisdom are often conflated in colloquial discourse, a discerning mind perceives a fundamental divergence between the two. Education is the formal acquisition of knowledge, often measured through degrees, academic accolades, and proficiency in structured disciplines. It is delivered through systematic curricula, institutionalized assessment, and theoretical frameworks. However, wisdom transcends this rigidity; it is the judicious application of knowledge to real-life contexts, enriched by experience, introspection, and emotional intelligence. An individual may be extensively educated yet remain bereft of wisdom if they lack the discernment to apply their learning ethically and effectively. Conversely, many wise individuals—farmers, artisans, elders—may not possess formal education, but their decisions exhibit prudence and sagacity cultivated through lived realities. Thus, education equips the mind, but wisdom enriches the soul. In an era dominated by information overload and algorithmic thinking, the schism between the two has widened. Educational institutions often prioritize rote memorization and standardized testing over critical thinking and moral reasoning. Consequently, society produces individuals proficient in problem-solving but deficient in decision-making that requires empathy, patience, or foresight. Wisdom, being innately human, cannot be downloaded or fast-tracked; it is earned through trial, failure, reflection, and a nuanced understanding of human nature. Furthermore, while education is temporally bounded—ending with formal schooling or academic milestones—wisdom is a lifelong pursuit. It does not boast certificates but manifests in humility, ethical consistency, and the ability to navigate ambiguity with grace. Ultimately, the highest form of intelligence lies not merely in knowing what is right, but in consistently choosing to do it, especially when it is inconvenient.

What is the central contrast drawn in the passage?

Education vs. career

Intelligence vs. memory

Reading vs. writing

Formal learning vs. applied wisdom

Q.No: 94 Read the following passage and answer the questions based on the passage:

While education and wisdom are often conflated in colloquial discourse, a discerning mind perceives a fundamental divergence between the two. Education is the formal acquisition of knowledge, often measured through degrees, academic accolades, and proficiency in structured disciplines. It is delivered through systematic curricula, institutionalized assessment, and theoretical frameworks. However, wisdom transcends this rigidity; it is the judicious application of knowledge to real-life contexts, enriched by experience, introspection, and emotional intelligence. An individual may be extensively educated yet remain bereft of wisdom if they lack the discernment to apply their learning ethically and effectively. Conversely, many wise individuals—farmers, artisans, elders—may not possess formal education, but their decisions exhibit prudence and sagacity cultivated through lived realities. Thus, education equips the mind, but wisdom enriches the soul. In an era dominated by information overload and algorithmic thinking, the schism between the two has widened. Educational institutions often prioritize rote memorization and standardized testing over critical thinking and moral reasoning. Consequently, society produces individuals proficient in problem-solving but deficient in decision-making that requires empathy, patience, or foresight. Wisdom, being innately human, cannot be downloaded or fast-tracked; it is earned through trial, failure, reflection, and a nuanced understanding of human nature. Furthermore, while education is temporally bounded—ending with formal schooling or academic milestones—wisdom is a lifelong pursuit. It does not boast certificates but manifests in humility, ethical consistency, and the ability to navigate ambiguity with grace. Ultimately, the highest form of intelligence lies not merely in knowing what is right, but in consistently choosing to do it, especially when it is inconvenient.

According to the author, why has the gap between education and wisdom widened in recent times?

Due to overuse of social media

Because wisdom is no longer valued

Because of rote learning and algorithmic methods

Because people stop learning after school

Q.No: 95 Choose the most suitable option to replace the highlighted part of the sentence: She has the reputation *to be a kind woman*.
