Q.No: 6 Instruction: Identify the assumptions that must hold for the statement to be valid, then choose the correct option.

Statement: While the world is moving towards automation, it is essential to ensure that ethical frameworks evolve alongside technological advancements to prevent misuse.

Assumptions:

- I. Automation can lead to ethical dilemmas.
- II. Ethical frameworks must be updated to keep pace with technological advancements.
- III. Automation will eventually replace human labor in all sectors.

निर्देश: कथन को मान्य बनाने के लिए आवश्यक मान्यताओं की पहचान करें, फिर सही विकल्प चुनें।

कथन: जबकि दुनिया स्वचालन की ओर बढ़ रही है, यह सुनिश्चित करना आवश्यक है कि दुरुपयोग को रोकने के लिए तकनीकी प्रगति के साथ-साथ नैतिक ढाँचे विकसित हों।

मान्यताएँ:

- ।. स्वचालन से नैतिक दुविधाएँ पैदा हो सकती हैं।
- ॥. तकनीकी प्रगति के साथ तालमेल रखने के लिए नैतिक ढाँचों को अद्यतन किया जाना चाहिए।
- ।।।. स्वचालन अंततः सभी क्षेत्रों में मानव श्रम की जगह ले लेगा।

The c	uter bailey surrounded the motte.
The k	ing's guard patrolled the lower bailey.

Convert the sentence provided below from its passive voice structure to an active voice structure: It has been alleged that confidential data was being leaked by insiders within the firm.
Insiders were leaking confidential data within the firm.
Confidential data had been leaked by insiders, it is alleged.
Insiders have allegedly been leaking confidential data within the firm.
The firm was allegedly leaking insider data.

O.No: 90 Read the following passage and answer the questions based on the passage: Group thinking, often referred to as groupthink, is a psychological phenomenon wherein the desire for unanimity within a group overrides the motivation to appraise alternative viewpoints critically. It frequently leads to flawed decision-making because dissent is either internally suppressed or socially penalized. Social conformity, its close ally, describes the act of aligning one's beliefs or behaviours with those of a majority, often subconsciously, in pursuit of acceptance or avoidance of conflict. In tightly knit groups such as corporate boards, political committees, or academic panels—individual members may refrain from expressing contrarian ideas, fearing ostracization or reputational risk. Over time, this collective homogeneity breeds intellectual stagnation, reducing innovation and enhancing vulnerability to strategic errors. The infamous Bay of Pigs invasion and the Challenger space shuttle disaster are frequently cited as textbook examples of decisions marred by groupthink. Psychologically, the roots of group conformity lie in our evolutionary inclination toward tribal belonging, where deviation was historically associated with survival risk. In modern society, the same instinct manifests through peer pressure, organizational culture, and digital echo chambers. Algorithms reinforce conformity by curating information bubbles that validate existing biases while filtering out divergent thought. However, the remedy to such cognitive myopia lies in institutionalizing dissent. Constructive disagreement, when encouraged within teams or communities, acts as an intellectual safeguard against tunnel vision. Promoting a culture where counterarguments are respected rather than reprimanded can lead to more robust, balanced, and resilient decision-making. In an age dominated by viral trends, polarized discourse, and performative alignment, the courage to question consensus is both rare and essential. True progress emerges not from blind allegiance to majority norms, but from critical inquiry and the audacity to challenge the comfortable. What is the central idea of groupthink as discussed in the passage? Collaborative brainstorming Valuing consensus over critique Trusting only experts Promoting decentralization

Q.No: 91	Read the following passage and answer the questions based on the passage: Group thinking, often referred to as groupthink, is a psychological phenomenon wherein the desire for unanimity within a group overrides the motivation to appraise alternative viewpoints critically.
