Q.No: 9 Read the following statement carefully and identify the conclusion that follows. Statement: The government has announced a reduction in LPG subsidies. Conclusions: Citizens will now have to pay more for LPG. The government has no money left. निम्नलिखित कथन को ध्यानपूर्वक पढ़ें और निष्कर्ष निकालें। कथन: सरकार ने एलपीजी सब्सिडी में कटौती की घोषणा की है। निष्कर्ष: ।. नागरिकों को अब एलपीजी के लिए ज्यादा भुगतान करना होगा। ॥. सरकार के पास पैसा नहीं बचा है। Only Conclusion I follows केवल निष्कर्ष । अनुसरण करता है Only Conclusion II follows केवल निष्कर्ष ॥ अनुसरण करता है Both I and II follow । और ॥ दोनों अनुसरण करते हैं Neither I nor II follows न तो। और न ही॥ अनुसरण करता है

Q.No: 10 Instruction: Identify the assumptions that must hold for the statement to be valid, then choose the correct option.

**Statement:** While technological advancements in energy production have made renewable sources more cost-competitive, their intermittent nature means that large-scale adoption will require significant investments in energy storage technologies to stabilize the grid.

## Assumptions:

- I. Renewable energy sources are not continuous and need energy storage solutions.
- II. The high cost of renewable energy production makes its adoption difficult without subsidies.
- III. Energy storage technologies are a necessary component of a stable energy grid with high renewable energy input.

निर्देश: कथन को मान्य बनाने के लिए आवश्यक मान्यताओं की पहचान करें, फिर सही विकल्प चुनें।

**कथन**: ऊर्जा उत्पादन में तकनीकी प्रगति ने नवीकरणीय स्रोतों को अधिक लागत-प्रतिस्पर्धी बना दिया है, लेकिन उनकी आंतरायिक प्रकृति का अर्थ है कि बड़े पैमाने पर अपनाने के लिए ग्रिड को स्थिर करने के लिए ऊर्जा भंडारण प्रौद्योगिकियों में महत्वपूर्ण निवेश की आवश्यकता होगी।

## मान्यताएँ:

- ।. नवीकरणीय ऊर्जा स्रोत निरंतर नहीं हैं और उन्हें ऊर्जा भंडारण समाधान की आवश्यकता है।
- ॥. नवीकरणीय ऊर्जा उत्पादन की उच्च लागत सब्सिडी के बिना इसे अपनाना मुश्किल बनाती है।
- ।।।. ऊर्जा भंडारण प्रौद्योगिकियाँ उच्च नवीकरणीय ऊर्जा इनपुट के साथ एक स्थिर ऊर्जा ग्रिड का एक आवश्यक घटक हैं।

### Q.No: 91 Read the following passage and answer the questions based on the passage:

India's legacy of healing practices—embodied in disciplines such as Yoga, Ayurveda, Siddha, and Unani—presents a complex synthesis of philosophy, biology, and metaphysics. Far from being static relics of the past, these systems have exhibited an evolving dynamism, continuously negotiating their space within both indigenous frameworks and global health discourses. At the heart of this healing ethos lies the idea that the human body is not an isolated physiological entity but a site of interconnected energies and rhythms. Yoga, as codified in the Yoga Sutras of Patanjali, is not merely a physical regimen but a holistic path aimed at harmonizing the body, mind, and spirit. In the modern era, however, it has undergone commodification, particularly in the West, where its philosophical moorings are often diluted into mere physical exercise or stress-reduction techniques. This recontextualization, while facilitating global popularity, raises questions about cultural appropriation and epistemic erosion. Traditional medicine systems such as Ayurveda view disease as an imbalance in the tridosha—vata, pitta, and kapha—principles that regulate bodily function. These systems emphasize prakriti (constitution), ahara (diet), and dinacharya (daily routine) as central to preventive healthcare. Unlike allopathy's symptom-targeting approach, traditional Indian medicine is premised on restoring equilibrium in the body's internal ecology. This integrative vision aligns with contemporary calls for personalized and preventive medicine, though methodological differences continue to stoke skepticism in the biomedical community. State patronage of AYUSH (Ayurveda, Yoga & Naturopathy, Unani, Siddha, and Homeopathy) underlines a renewed institutional interest in traditional systems. However, critics caution against uncritical endorsement, citing the lack of standardized clinical trials, variability in diagnostic models, and challenges in evidencebased validation. Furthermore, pharmaceutical commercialization of Ayurvedic formulations often sidelines traditional knowledge holders, reducing centuries-old practices to marketable commodities. The interface between Yoga and traditional medicine with modern healthcare is therefore both promising and fraught. While integrative models are being explored—especially in palliative care, mental health, and chronic disease management—they require epistemic humility and regulatory rigor. The danger lies in either romanticizing these systems as panaceas or discarding them as pre-scientific relics. Ultimately, the relevance of Yoga and traditional medicine in contemporary India will depend on the country's ability to safeguard their philosophical depth while subjecting them to transparent, rigorous scrutiny. Neither dogmatic revivalism nor dismissive scientism will suffice. What is needed is a dialogical framework where tradition and modernity co-evolve—not in opposition, but in mutual enrichment.

What tension does the passage highlight regarding the global adoption of Yoga?

Lack of flexibility

Loss of its philosophical essence

Shortage of teachers

Over-regulation by India

Object-Oriented Programming (OOP) is a programming paradigm based on the concept of "objects," which can contain data and code. This allows a programmer to specify the structure and behavior of an object-oriented program. The key advantage of this approach is that it models real-world entities, making complex systems easier to manage and debug. 2, 1, 3, 4 4, 3, 2, 1 3, 1, 4, 2 1, 2, 3, 4
