Read the passage intently and choose the most appropriate option to fill in each blank: Climate discourse, once the domain of ecological alarm and policy whitepapers, has now become a theater of geopolitical choreography. What masquerades as international cooperation often (1) the residues of colonial asymmetry—where culpability is distributed politely, but power still negotiates who must "transition" and who may continue. The carbon footprint becomes a moral metric only when traced in Southern sand; in Northern snow, it is reframed as "developmental necessity."Funding mechanisms are not immune to this dissonance. Green finance flows in tributaries engineered by creditworthiness, not climate need. Adaptation becomes a (2), where vulnerable nations perform resilience to attract capital, rather than receive redress. "Net zero," meanwhile, floats like a talisman—invoked often, defined rarely. In such a paradigm, technocratic optimism obscures the uneven cartography of suffering. Satellites scan deforested zones with precision, but remain blind to the (3) histories beneath them. Carbon markets, too, offer the illusion of absolution—one entity's excess "offset" by another's austerity. But offsets do not erase the heat; they only relocate the guilt. To resist climate colonialism is to unmask the benevolence of treaties and question the neutrality of metrics. Until the grammar of environmental justice is (4), and not merely adjusted, any climate action risks becoming a ritual of (5), not repair. What should come in the place of blank number (1)?
