PART-D (English Comprehension)

Q.No: 76 In the following question, a sentence with a blank is given, followed by five words labeled (1), (2), (3), (4), and (5).
Choose the word that fills the blank appropriately in the context of the passage.

As technological ingenuity accelerates exponentially, humanity stands poised at an inflection point, wherein virtual realms (1) _____ rival the tangible world in complexity and significance. Virtual reality (VR), once relegated to the domain of speculative fiction, now engenders immersive ecosystems capable of simulating emotional, sensory, and cognitive experiences with bewildering verisimilitude. Nevertheless, despite its sophistication, VR often lacks the existential gravitas intrinsic to corporeal existence, the ontological authenticity that roots human consciousness in materiality.

While proponents of VR herald it as the progenitor of a post-physical civilization, skeptics caution that overreliance on synthetic environments (2) _____ human agency and fragment collective identity. A crucial determinant in this dialectic will be how societies negotiate the (3) _____ liminality between augmentation and escapism.

Actual reality, laden with imperfections, demands resilience, compromise, and ethical engagement — qualities often attenuated in consequence-free virtual spaces.

Conversely, VR offers avenues for radical creativity, democratization of experiences, and transcendence of biological constraints. Thus, whichever modality predominates in shaping the next civilization, the imperative to cultivate critical consciousness (4) _____ paramount. Moreover, if virtual domains evolve without regulatory frameworks imbued with philosophical rigor, humanity may inadvertently engender a hyper-fragmented reality devoid of epistemic cohesion. Within such a milieu, distinguishing truth from fabrication becomes not merely challenging but (5) Sisyphean.

Thus, the onus falls upon contemporary thinkers, technologists, and policymakers to steer civilization toward a future where both virtual and actual realities coalesce, enhancing rather than diminishing the human condition.

Choose correct verb form.(1)

	is beginning to
	are beginning to
	had begun to
	was beginning to
