Q.No: 7 **Read the following passage and answer the questions based on it:**

The explosive integration of Artificial Intelligence (AI) into the workplace represents a tangled web of ethical issues that need to be carefully addressed. While AI holds out the potential for increased productivity, mechanisation of routine tasks, and new opportunities for economic development, it raises to its highest power fundamental questions regarding job loss, algorithmic bias, and the redefinition of human work. Strong retraining initiatives and proactive legislative responses are necessary to counteract social disruption in the face of the possibility of widespread job losses, particularly in repetitive and predictable tasks. More dangerously, AI programs that learn from historical data have the potential to reinforce and even magnify prevailing cultural biases, leading to biased performance evaluations or discriminatory hiring practices. This creates issues of fairness and equity in a more automated world. In addition, as AI fills increasing numbers of decision-making positions, the accountability issue is at the forefront: who is accountable when an AI system commits a critical mistake or inflicts harm? Strong retraining initiatives and proactive legislative responses are necessary to counteract social disruption in the face of the possibility of widespread job losses, particularly in repetitive and predictable tasks. More dangerously, AI programs that learn from historical data have the potential to reinforce and even magnify prevailing cultural biases, leading to biased performance evaluations or discriminatory hiring practices.

What is one of the main ethical concerns related to the integration of AI into the workplace?

Increased job opportunities in all sectors

Reinforcement and magnification of cultural biases

Improved decision-making in human resource management

Reduction in the use of technology in decision-making

[Click Here to Challenge Question No.: 8](#)

Q.No: 8 **Read the following passage and answer the questions based on it:**

The explosive integration of Artificial Intelligence (AI) into the workplace represents a tangled web of ethical issues that need to be carefully addressed. While AI holds out the potential for increased productivity, mechanisation of routine tasks, and new opportunities for economic development, it raises to its highest power fundamental questions regarding job loss, algorithmic bias, and the redefinition of human work. Strong retraining initiatives and proactive legislative responses are necessary to counteract social disruption in the face of the possibility of widespread job losses, particularly in repetitive and predictable tasks. More dangerously, AI programs that learn from historical data have the potential to reinforce and even magnify prevailing cultural biases, leading to biased performance evaluations or discriminatory hiring practices. This creates issues of fairness and equity in a more automated world. In addition, as AI fills increasing numbers of decision-making positions, the accountability issue is at the forefront: who is accountable when an AI system commits a critical mistake or inflicts harm? Strong retraining initiatives and proactive legislative responses are necessary to counteract social disruption in the face of the possibility of widespread job losses, particularly in repetitive and predictable tasks. More dangerously, AI programs that learn from historical data have the potential to reinforce and even magnify prevailing cultural biases, leading to biased performance evaluations or discriminatory hiring practices.

What is necessary to address social disruption caused by AI in the workplace?

Increased automation in decision-making

Proactive legislative responses and strong retraining initiatives

Limiting the use of AI in certain industries

Complete removal of AI systems from workplaces

[Click Here to Challenge Question No.: 9](#)

Q.No: 9 **Read the following passage and answer the questions based on it:**

The explosive integration of Artificial Intelligence (AI) into the workplace represents a tangled web of ethical issues that need to be carefully addressed. While AI holds out the potential for increased productivity, mechanisation of routine tasks, and new opportunities for economic development, it raises to its highest power fundamental questions regarding job loss, algorithmic bias, and the redefinition of human work. Strong retraining initiatives and proactive legislative responses are necessary to counteract social disruption in the face of the possibility of widespread job losses, particularly in repetitive and predictable tasks. More dangerously, AI programs that learn from historical data have the potential to reinforce and even magnify prevailing cultural biases, leading to biased performance evaluations or discriminatory hiring practices. This creates issues of fairness and equity in a more automated world. In addition, as AI fills increasing numbers of decision-making positions, the accountability issue is at the forefront: who is accountable when an AI system commits a critical mistake or inflicts harm? Strong retraining initiatives and proactive legislative responses are necessary to counteract social disruption in the face of the possibility of widespread job losses, particularly in repetitive and predictable tasks. More dangerously, AI programs that learn from historical data have the potential to reinforce and even magnify prevailing cultural biases, leading to biased performance evaluations or discriminatory hiring practices.

Which of the following is the primary ethical dilemma associated with AI systems in the workplace, as discussed in the passage?

- The loss of human creativity in decision-making processes
- The challenge of determining accountability when AI systems cause harm or errors
- The introduction of highly efficient decision-making processes
- The complete removal of human oversight in all tasks performed by AI

[Click Here to Challenge Question No.: 10](#)

Q.No: 10 **Read the following passage and answer the questions based on it:**

The explosive integration of Artificial Intelligence (AI) into the workplace represents a tangled web of ethical issues that need to be carefully addressed. While AI holds out the potential for increased productivity, mechanisation of routine tasks, and new opportunities for economic development, it raises to its highest power fundamental questions regarding job loss, algorithmic bias, and the redefinition of human work. Strong retraining initiatives and proactive legislative responses are necessary to counteract social disruption in the face of the possibility of widespread job losses, particularly in repetitive and predictable tasks. More dangerously, AI programs that learn from historical data have the potential to reinforce and even magnify prevailing cultural biases, leading to biased performance evaluations or discriminatory hiring practices. This creates issues of fairness and equity in a more automated world. In addition, as AI fills increasing numbers of decision-making positions, the accountability issue is at the forefront: who is accountable when an AI system commits a critical mistake or inflicts harm? Strong retraining initiatives and proactive legislative responses are necessary to counteract social disruption in the face of the possibility of widespread job losses, particularly in repetitive and predictable tasks. More dangerously, AI programs that learn from historical data have the potential to reinforce and even magnify prevailing cultural biases, leading to biased performance evaluations or discriminatory hiring practices.

Which of the following statements is grammatically correct?

- The integration of AI into workplace raises questions regarding job loss, algorithmic bias, and the redefinition of human work.
- The integration of AI into workplace raise questions regarding job loss, algorithmic bias, and the redefinition of human work.
- The integration of AI into workplace raise questions regarding job losses, algorithmic bias, and redefinition of human work.
- The integration of AI into workplace raises questions regarding job losses, algorithmic bias, and the redefinition of human work.

[Click Here to Challenge Question No.: 11](#)

Q.No: 11 Read the following passage and answer the questions based on it:

The explosive integration of Artificial Intelligence (AI) into the workplace represents a tangled web of ethical issues that need to be carefully addressed. While AI holds out the potential for increased productivity, mechanisation of routine tasks, and new opportunities for economic development, it raises to its highest power fundamental questions regarding job loss, algorithmic bias, and the redefinition of human work. Strong retraining initiatives and proactive legislative responses are necessary to counteract social disruption in the face of the possibility of widespread job losses, particularly in repetitive and predictable tasks. More dangerously, AI programs that learn from historical data have the potential to reinforce and even magnify prevailing cultural biases, leading to biased performance evaluations or discriminatory hiring practices. This creates issues of fairness and equity in a more automated world. In addition, as AI fills increasing numbers of decision-making positions, the accountability issue is at the forefront: who is accountable when an AI system commits a critical mistake or inflicts harm? Strong retraining initiatives and proactive legislative responses are necessary to counteract social disruption in the face of the possibility of widespread job losses, particularly in repetitive and predictable tasks. More dangerously, AI programs that learn from historical data have the potential to reinforce and even magnify prevailing cultural biases, leading to biased performance evaluations or discriminatory hiring practices.

How does the integration of AI into the workplace create a potential risk in terms of social equity, according to the passage?

AI will completely replace human decision-makers, leading to universal unemployment

AI's reliance on historical data could perpetuate and exacerbate existing cultural biases.

AI will make workplace decisions based on ethical considerations rather than data

AI's impact on job roles will primarily benefit low-skill workers

Q.No: 31 In each question below is given a statement followed by two courses of action numbered I and II. You have to assume everything in the statement to be true and on the basis of the information given in the statement, decide which of the suggested courses of action logically follow(s) for pursuing.

Statement: Students are found spending too much time on video games.

Course of Action I: Ban mobile games.

Course of Action II: Encourage students to engage in outdoor activities.

प्रत्येक प्रश्न के नीचे एक कथन दिया गया है जिसके बाद दो कार्यविधियाँ क्रमांक I और II दी गई हैं। आपको कथन में दी गई हर बात को सत्य मानना है और कथन में दी गई जानकारी के आधार पर, यह तय करना है कि दी गई कौन सी कार्यविधि तार्किक रूप से अनुसरण करती है।

कथन:: छात्र वीडियो गेम्स पर बहुत अधिक समय बिता रहे हैं।

कार्रवाई I: मोबाइल गेम्स पर प्रतिबंध लगाएं।

कार्रवाई II: छात्रों को बाहरी गतिविधियों में भाग लेने के लिए प्रोत्साहित करें।

Only I follows

केवल I अनुसरण करता है

Only II follows

केवल II अनुसरण करता है

Both I and II follow

दोनों I और II लागू होते हैं

Neither I nor II follows

ना तो I और ना ही II अनुसरण करता है

Q.No: 32 Few of the letters are given followed by a question mark (?) these letters are following a specific pattern you have to give the correct option which can replace question mark.

Identify the next term: C, E, G, I, ?
