Q.No: 5 Read the following passage and answer the questions based on it:

Mandala art, a term derived from the Sanskrit word for "circle,". Mandalas are mathematical and metaphorical works of art that have captivated people for ages. In essence, a mandala is a circle pattern that represents the cosmos and the individual's journey. The genesis of everything, one's identity, or a heavenly essence are all represented by the design's centre. Complex and often symmetrical patterns spread forth from this hub representing the universe's growth and the continuous flow of life.

Mandalas, which have their roots in both Buddhism and Hinduism, are powerful instruments for spiritual ritual and meditation. In order to symbolise the fleeting nature of life and the rejection of earthly possessions, monks painstakingly create these elaborate patterns out of coloured sand, only to brush them away when finished. Making a mandala has therapeutic benefits in addition to its religious significance. Drawing its geometric patterns in a methodical and repeated manner helps to reduce tension, improve focus, and calm the mind. The act of creating is a form of active meditation that allows the artist to concentrate and attain inner peace.

What does the term "mandala" mean in Sanskrit?
