[Click Here to Challenge Question No.: 15](#)

Q.No: 15 Study the following information to answer the given questions.

Seven persons: A, B, C, D, E, F, and G purchased some items one after another i.e., eraser, pen, TV, printer, mouse, mug, and phone but not necessarily in the same order.

A purchased a mouse and there is a gap of 2 persons between A and E. E didn't come first or at last. As many persons came after A are the same as the number of persons who came before F who purchased the pen. C purchased an eraser immediately before A. There is a gap of 4 persons between E and G who purchased a printer. D purchased a phone immediately before E who purchased a TV. The mug is purchased by B.

There is a gap of how many persons between F and G?

दिए गए प्रश्नों के उत्तर देने के लिए निम्नलिखित जानकारी का अध्ययन कीजिए।

सात व्यक्तियां: A, B, C, D, E, F और G ने एक के बाद एक कुछ वस्तुएँ खरीदीं, जैसे: रबड़, पेन, टीवी, प्रिंटर, माउस, मग और फ़ोन, लेकिन जरूरी नहीं कि इसी क्रम में हों।

A ने एक माउस खरीदा और A और E के बीच 2 व्यक्तियों का अंतर है। E पहले या अंत में नहीं आया। A के बाद जितने व्यक्ति आए, उतने ही व्यक्ति F से पहले आए, जिसने पेन खरीदा था। C ने A से ठीक पहले रबड़ खरीदी। E और G, जिसने प्रिंटर खरीदा, के बीच 4 व्यक्तियों का अंतर है। D ने E, जिसने टीवी खरीदा था, से ठीक पहले एक फ़ोन खरीदा। मग B ने खरीदा है।

F और G के बीच कितने व्यक्तियों का अंतर है?

In the given passage, some words have been deleted. Read the passage intently and choose the most appropriate option to fill in each blank:

<https://sscstudy.com/>

In recent years, bio-surveillance has migrated from the periphery of crisis management into the marrow of everyday governance. What began as a provisional response to epidemiological disruption has, with startling velocity, matured into a (1) _____ instrument of statecraft. The body, once a site of private experience, is now parsed into micro-indicators, archived not as narratives but as anomalies within statistical matrices. The threshold for intervention has shifted — not at diagnosis, but at deviation. Such a regime thrives on a curious inversion: surveillance no longer reacts to illness; it anticipates it. The calculus of care becomes indistinguishable from the logic of control, and protection is no longer offered but enforced. In this architecture, the citizen is both beneficiary and suspect, suspended in a biopolitical gaze that renders health a function of (2) _____, not autonomy. What is striking, however, is not merely the pervasiveness of this apparatus, but its opacity. Embedded technologies track pulse, breath, temperature — but who interprets? Who decides what qualifies as pathological? The grammar of governance here is not public but procedural, not deliberative but (3) _____. If unchecked, this mode risks normalizing a world in which vigilance masquerades as virtue. The ethical stakes are not peripheral but foundational: in rendering health as measurable, we risk rendering it (4) _____. The ineffable — pain, anxiety, even trust — becomes illegible within a model that privileges only what can be graphed. The challenge, then, is not to reject technology but to reinscribe its terms. Bio-surveillance must be subject to democratic scrutiny, not immune to it. Otherwise, we inherit not safety but a simulated solidarity, and in its name, a deeply (5) _____ submission.

What should come in the place of blank number (1)?

interpretive

diagnostic

ornamental

cautionary

If unchecked, this mode risks normalizing a world in which vigilance masquerades as virtue. The ethical stakes are not peripheral but foundational: in rendering health as measurable, we risk rendering it (4) _____. The ineffable — pain, anxiety, even trust — becomes illegible within a model that privileges only what can be graphed. The challenge, then, is not to reject technology but to reinscribe its terms. Bio-surveillance must be subject to democratic scrutiny, not immune to it. Otherwise, we inherit not safety but a simulated solidarity, and in its name, a deeply (5) _____ submission.

What should come in the place of blank number (3)?

ceremonial

therapeutic

technocratic

erratic

Q.No: 182

In the given passage, some words have been deleted. Read the passage intently and choose the most appropriate option to fill in each blank:

In recent years, bio-surveillance has migrated from the periphery of crisis management into the marrow of everyday governance. What began as a provisional response to epidemiological disruption has, with startling velocity, matured into a (1) _____ instrument of statecraft. The body, once a site of private experience, is now parsed into micro-indicators, archived not as narratives but as anomalies within statistical matrices. The threshold for intervention has shifted — not at diagnosis, but at deviation. Such a regime thrives on a curious inversion: surveillance no longer reacts to illness; it anticipates it. The calculus of care becomes indistinguishable from the logic of control, and protection is no longer offered but enforced. In this architecture, the citizen is both beneficiary and suspect, suspended in a biopolitical gaze that renders health a function of (2) _____, not autonomy. What is striking, however, is not merely the pervasiveness of this apparatus, but its opacity. Embedded technologies track pulse, breath, temperature — but who interprets? Who decides what qualifies as pathological? The grammar of governance here is not public but procedural, not deliberative but (3) _____. If unchecked, this mode risks normalizing a world in which vigilance masquerades as virtue. The ethical stakes are not peripheral but foundational: in rendering health as measurable, we risk rendering it (4) _____. The ineffable — pain, anxiety, even trust — becomes illegible within a model that privileges only what can be graphed. The challenge, then, is not to reject technology but to reinscribe its terms. Bio-surveillance must be subject to democratic scrutiny, not immune to it. Otherwise, we inherit not safety but a simulated solidarity, and in its name, a deeply (5) _____ submission.

What should come in the place of blank number (4)?

indispensable

visible

mechanical

subordinate
