Q.No: 49	<p>In the following question, two statements are followed by four conclusions. You have to assume the given statements to be true, even if they seem to be at variance with commonly known facts. Read the conclusions carefully and then decide which of the given conclusions logically follows from the statements.</p> <p>Statements: Some fruits are sweet. All sweet things are edible.</p> <p>Conclusions:</p> <ul style="list-style-type: none">I. Some fruits are edibleII. All fruits are edibleIII. No fruit is edibleIV. All edibles are sweet
----------	---

निम्नलिखित प्रश्न में दो कथन और उसके बाद चार निष्कर्ष दिए गए हैं। आपको दिए गए कथनों को सत्य मानना है, भले ही वे सामान्य <https://sscstudy.com/> होते हैं। निष्कर्षों को ध्यानपूर्वक पढ़िए और फिर निर्णय कीजिए कि दिए गए निष्कर्षों में से कौन सा निष्कर्ष कथनों का तार्किक रूप से अनुसरण करता है।

कथन:

कुछ फल, मीठे होते हैं।

सभी मीठी चीज़ें, खाने योग्य होती हैं।

निष्कर्ष:

- I. कुछ फल, खाने योग्य होते हैं।
- II. सभी फल, खाने योग्य होते हैं।
- III. कोई भी फल, खाने योग्य नहीं होता।
- IV. सभी खाने योग्य चीज़ें, मीठी होती हैं।

Only I

केवल I

Both II and III

II और III दोनों

Both I and II

I और II दोनों

Only IV

केवल IV

Q.No: 161	<p>Which of the given options arranges the following sentences in the most logical sequence to form a meaningful paragraph?</p> <ol style="list-style-type: none"> Without keystone species, entire ecosystems can collapse, leading to significant biodiversity loss. The concept of a keystone species was first introduced by ecologist Robert Paine, who studied the effect of removing certain predators from an ecosystem. Keystone species play a disproportionately large role in maintaining the structure and stability of their ecosystems. For example, sea otters help regulate sea urchin populations, preventing the destruction of kelp forests. This idea revolutionized ecology by highlighting how some species have a far greater impact on their environment than others.

Q.No: 173

In the given passage, some words have been deleted. Read the passage intently and choose the most appropriate option to fill in each blank:

<https://sscstudy.com/>

In the contemporary epoch of algorithmic governance and hyper-networked economies, the discourse of agency has undergone a paradigmatic mutation. No longer anchored in traditional notions of volition or deliberation, subjectivity is increasingly (1)____ by ambient infrastructures that anticipate, nudge, and pre-empt decision-making before cognition consolidates intention. In such a regime, autonomy becomes retroactive—a post-facto narrative stitched together by feedback loops of personalization, predictive modeling, and biometric calibration. The liberal ideal of the rational actor, so central to modern jurisprudence and economic theory, finds itself (2)____ under the weight of distributed cognition, machinic interpellation, and environmental scripting. Agency, in this schema, is not exercised but programmed; it is neither given nor seized but orchestrated through micro-environmental cues and algorithmic affordances. The individual becomes less a sovereign self than a (3)____ node in a probabilistic matrix of behavioral speculation. Within this ontological reconfiguration, resistance too undergoes a semiotic shift. Acts of refusal no longer manifest through overt defiance but through obfuscation, misalignment, and withdrawal from legibility. Yet even these gestures risk being (4)____ by the very systems they attempt to subvert—recuperated as marketable deviance, branded subcultures, or managed dissent. If every deviation is eventually re-circulated as novelty, then the terrain of the political itself becomes (5)____—evacuated of antagonism and steeped in simulation.

What should come in the place of blank number (1)?

foreclosed

automated

colonized

mediated
